Daily Schedule

(subject to change!)

Monday (Koelbel 100)

9:00-10:30: Introduction and computing resources

10:30-11:00: Break

11-12:30: Theory of molecular dynamics simulation

12:30-1:45: Lunch

1:45-3:15: Theory of molecular dynamics simulations

3:15-3:45: Break

3:45-5:00: Running Simulation in GROMACS

Evening: Small group dinners (pay on own)

Tuesday (Koelbel 100)

9:00-10:30: System Setup

10:30-11:00: Break

11-12:30: System Setup

12:30-1:45: Lunch

1:45-3:15: System Setup

3:15-3:45: Break

3:45-5:00: Simulation Analysis

Evening: Small group dinners (pay on own)

7:00: Chautauqua Hike after Dinner (tentative)

Wednesday (Koelbel 100)

9:00-10:30: Simulation Analysis

10:30-11:00: Break

11-12:30: Simulation Analysis

12:30-1:45 Lunch

1:45-3:15: Free Energy Calculations
3:15-3:45 Break:
3:45-5:00: Free Energy Calculations
Poster session: 5:30-7:00 (in Koebel 100)
Evening: Small group dinners (pay on own)

Thursday (Koebel 100)

9:00-10:30: Free Energy Calculations
10:30-11:00: Break
11-12:30: Free Energy Calculations
12:30-1:45: Lunch
1:45-3:15: Enhanced Sampling
3:15-3:45: Break
3:45-5:00: AMA (Ask Me Anything about science, careers, research with instructors)
Evening: Group picnic

Friday (Koebel 217 (note location change!))

9:00-10:30: Enhanced sampling
10:30-11:00: Break
11-12:30: Enhanced sampling and workshop farewell

Logistics

Colorado Weather:

- Boulder is at higher altitude (~5400 feet above sea level), dry, and this week, predicted to be quite hot (likely in the mid-90's). We highly recommend you bring a refillable water bottle, and drink a lot! You might consider bringing some headache medications in case you get mild altitude sickness, and sunscreen if you plan on spending more time outside than just walking between sessions, housing, and meals!

Coming from airport:

- The AB1 is \$10 from the transportation center at DIA, which can be found on the lower level. Take the escalator below the Westin hotel down after exiting from south end of the airport. Once at the bottom of the escalator, the bus area will be directly **behind** the escalator. Check the [Route AB1 Schedule](#), and select Sunday/Holiday Westbound. Last bus is 12:10 am. Buses can often leave 1-2 min before scheduled. Get off at the Broadway and Baseline stop in Boulder, noted on the map below.
- We will email out arrival information for people who want to carpool on either rental cars or rideshares if you contacted us about this.

Housing:

- You should have gotten a letter with housing information and check-in. Please let us know if there are any questions with regards to housing that are not answered by the letter! The check-in location is noted on the map.

Dining:

- Breakfast and Lunch are provided M-Thurs, Just breakfast on Friday - you will get a card when you check in. Both meals are at C4C (Center for Community, a short walk from Andrews Hall - see map below). Dinners M-W will be small groups (individuals pay). There will be a group picnic on Thursday. Breakfast is available starting at 7:00 am. It's all you can eat, check out the options!

Lecture locations:

- We will be in Koelbel 100 M-Th, Koelbel 2017 on Friday. Koelbel (part of Leeds business school) is the bigger building northwest of C4C (see map below). The easiest way to get to the lecture room is enter on the southwest entry, go towards the stairs. From the top of the stairs, you will see down to room 100. We will have signs.

Poster session:

- Posters will be on foam posterboards on easels, setup will be during breaks on Wednesday, with poster session on Wednesday afternoon

Map:

Setting up [Bridges2](#)

- [Log in to Bridges2](#) with your PSC username and password
 - This is your [ACCESS](#) username, password is the one you set ([reset password here](#)) when creating your [new PSC account](#).
- If you're going to use the command-line and visualize things with VMD, use the Interactive Desktop. Make sure to disable screen lock and screensaver if you are going to step away.

OPEN

OnDemand

OnDemand provides an integrated, single access point for all of your HPC resources.

Pinned Apps A featured subset of [all available apps](#)

Bridges2 Interactive Desktop

This app will launch an interactive desktop on one or more compute nodes. You will have full access to the resources these nodes provide. This is analogous to an interactive batch job.

Desktop Environment

xfce

Account

see220002p

Number of hours

1

Extra Slurm Args

☐ I would like to receive an email when the session starts

Launch

* The Bridges2 Interactive Desktop session data for this session can be accessed under the [data root directory](#).

For each session, 4 hours is pretty sensible (before or after lunch)

Wait until you can press the Launch Bridges2 Interactive Desktop button in the lower left corner:

Bridges2 Interactive Desktop (42145209) 1 node | 1 core | Running

Host: >_ 1001.ib.bridges2.psc.edu Delete

Created at: 2026-07-11 23:15:02 EDT

Time Remaining: 51 minutes

Session ID: 18d8e223-fc65-41a8-a981-6113292fb703

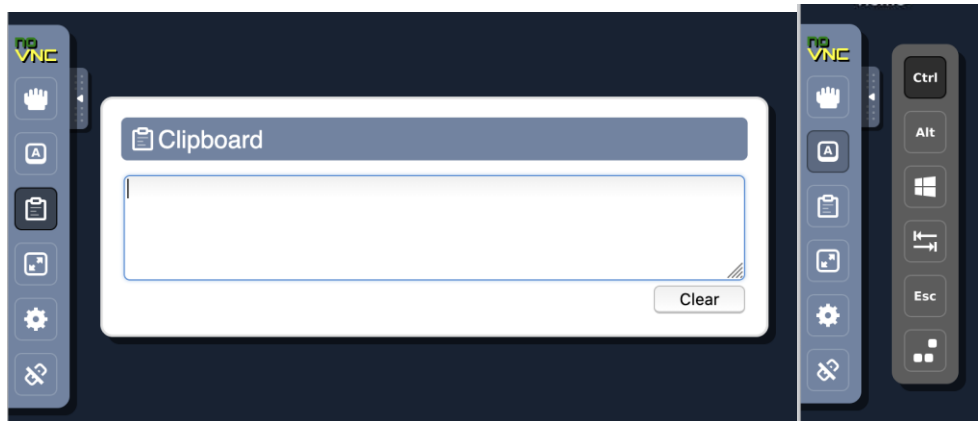

Compression 0 (low) to 9 (high) Image Quality 0 (low) to 9 (high)

Launch Bridges2 Interactive Desktop View Only (Share-able Link)

- At your command prompt, run:
module load gromacs
module load vmd

Note that copy-pasting from your laptop onto Bridges2 takes extra steps. See below for screenshots that show what it looks like after clicking the left sidebar to open up the clipboard (paste your text into there first), and then use the paste functionality (e.g., by right-clicking) within the interactive terminal. To paste my password in, when the screen locked, I had to paste my password into the clipboard, then activate the “Ctrl” button in the second-from-the-top menu,

then put my cursor on the password field and press “v” to paste. (because Ctrl was already being held by activating that button)

Requesting Nodes on Bridges2

CPU job:

- Hours: 1 (min) to 8 (max). Recommended **4** for the morning, and asking for another 4 after lunch
- Nodes: typically 1 for this workshop, depending on the activity
- Account: **see220002p** (if you have another allocation, be sure to select this one so you don't use that one!)
- Partition: **RM-shared** (single nodes) or RM-small (multiple nodes)
- Extra SLURM Args: **-n 4** (this will give 4 cores), **or up to 128** depending on the activity

Interactive BASH session

From the shell (either OnDemand or ssh):

```
interact -p RM-shared -n 4 -t 4:00:00 -A see220002p
```

A bit of disambiguation:

- NSF ACCESS is one key account to create, that will enable us to add you to our *allocation*, which is a set of computational resources that we'll use for the workshop. We don't set that account up at PSC's website, which is what their warning message is about that looks like this:
"If you need to be added to an ACCESS awarded project please do not request an account here. Create an account at <https://allocations.access-ci.org> if you don't already have one. Then ask the PI of your project to add you as a user on the project at <https://allocations.access-ci.org>."
- We also need an account at the Pittsburgh Supercomputing Center (PSC) and after you do that they will send you an email from grants@psc.edu when they have created your separate PSC account. It may take a couple of hours after you make your account. There is a confusing warning on the PSC new account page up above, you still need a PSC account to login to Bridges2, the NSF ACCESS account is so we can *charge* your Bridges2 usage to our allocation.
- You *may* already have both of these accounts, especially if you do work on Bridges2, or if you have taken i-CoMSE workshops previously.

Your email to activate your account should have come from grants@psc.edu

Set initial PSC password: <https://apr.psc.edu/>

help@psc.edu <- email for any help requests with PSC.

1. Eric got some new error messages about ACCESS accounts. The following people could not be added to the allocation yet because in their ACCESS accounts, they have "Country of Residence not set". After you set your country of residence at [ACCESS](#), email ericjankowski@boisestate.edu and I'll probably be the quickest at getting you re-added to the allocation.
 1. aaliyu
 2. aijimakinwa
 3. athompson8
 4. cbrandt1
 5. emcdonald2
 6. jalleh
 7. jchisammajid
 8. ludoh
 9. mkareem
 10. pkhadka
 11. shammoudi

12. yliu124

2. The following list of people were not found to have access accounts, either they misunderstood or made typos:

1. ~~amcosta1804~~ added munizdea

2. DVM6-P7K7 - doesn't look like an ACCESSS username

3. ~~FahsaiNak~~ added Fahsai Nakarin

4. ~~joelaforet~~ Joe has an account at jlaforet that is added

5. ~~lepaezb~~ added Luis Paez Belran III

6. Lwhitm1 - lwhitmore exists need to set Country of Residence.

7. nahmmond1 - nhammond1 exists (Nikki) needs to set Country of Residence.
